

TAC-Series Thrust Angular Contact Ball Bearings for Ball Screw Support

The NSKHPS TAC-series of Support Bearings for Ball Screws is available with a product lineup, as the bearings were improved by focusing on material cleanliness - which has a crucial impact on the bearings life. Universal arrangement bearings for interchangeable matching.

Product Features

- Improved dynamic load ratings
- Increased bearing life
- Increased number of balls
- Available with light-contact seals for low torque
- Contact Angle 60°

Benefits

- Improved high-speed performance
- Ensuring low temperature rise by the use with light-contact seals

Condition Description

- Contamination
- High Load
- High Temperature

Industries

- Machine Tools
- Semiconductor

30 TAC 62 C DDG SU H PN7C

Description

30	Nominal Bore Diameter
TAC	Bearing Type Symbol
62	Nominal Outer Diameter
C	Internal Design
DDG	Seal
SU	Arrangement
H	Preload
PN7C	Accuracy
