

NSKHPS Deep Groove Ball Bearings

The range NSKHPS Deep Groove Ball Bearings are focusing on a wide range of sizes offering a high degree of versatility for various general-purpose applications. These NSKHPS bearings have an increased bearing life of 15% compared to conventional bearings.

Product Features

- Improved material cleanliness
- Increased bearing life up to 15%
- Available open, sealed or shielded

Benefits

- Limiting Speed increased by 15%
- Improved running accuracy

Condition Description

- High Accuracy
- High Speed

Industries

- Electric Motors
- Fans and Blowers
- Industrial Pumps and Compressors
- Semiconductor

63 03 ZZ CM & NS7S

Description

63	Bearing type and series
03	Bore diameter
ZZ	Shields on both sides
CM	Radial Internal Clearance
&	NSKHPS
NS7S	Grease type / Grease quantity
